

KÖNIGHAUS

INFRAROT

Instruction manual
M-Serie/LED

Instructions

Remote Control Pairing

After turning on the heater, you will hear a beep. Press the *lighting button* five times. The pairing is successful and the process is completed within 10 seconds.

Lighting

Press the *lighting button* once to activate the lighting function and press the *lighting button* again to turn off the lighting.

Heating

Press the heating button once to activate the heating function. Press it again to turn off the heating.

Timer

When the heating is turned on, press the *timer button* to cycle between 1H, 2H, 4H, 6H, and 8H, and to turn off the heating function at the specified time.

Temperatur/+

When the heating is switched on, press the *temperature + button* to set the desired room temperature. When the set temperature is reached, the heating switches off automatically and restarts if the temperature falls below the set value.

Temperatur/-

When the heating is switched on, press the *temperature - button* to set the desired room temperature. When the set temperature is reached, the heating switches off automatically and restarts if the temperature falls below the set value.
